Regulations and labelling

This section outlines important regulatory requirements and labelling standards for Unite suppliers. By adhering to these guidelines, you can ensure legal compliance and continue to support Unite's commitment to transparency and quality on our platform.

Each article in this section offers detailed explanations of the requirements, their importance and clear instructions for implementation in your Unite catalogue. By following these guidelines, you'll ensure your catalogues meet legal standards and provide transparent information to customers.

Detailed information is available for the following topics:

Regulations and labelling
Energy labelling

Regulations and labelling
GHS labelling
