Unite

How to search on Unite

In this article, you'll learn how to find items quickly using Unite's search function, how to sort search results, and how to view product details. Unite lets you browse a broad selection of items in one place, covering both your framework suppliers and the pre-integrated assortment.

How to use Unite's search function

Learn how to use Unite's search function to find items quickly and easily.

Search in web access setup

Search in PunchOut setup

On Unite, you search a large number of catalogues in an instant. Start your search by entering the product or brand name, or the EAN or manufacturer ID directly in the search field. Alternatively, you can click on the various categories (e.g. 'Stationery') and subcategories to find the product you need.
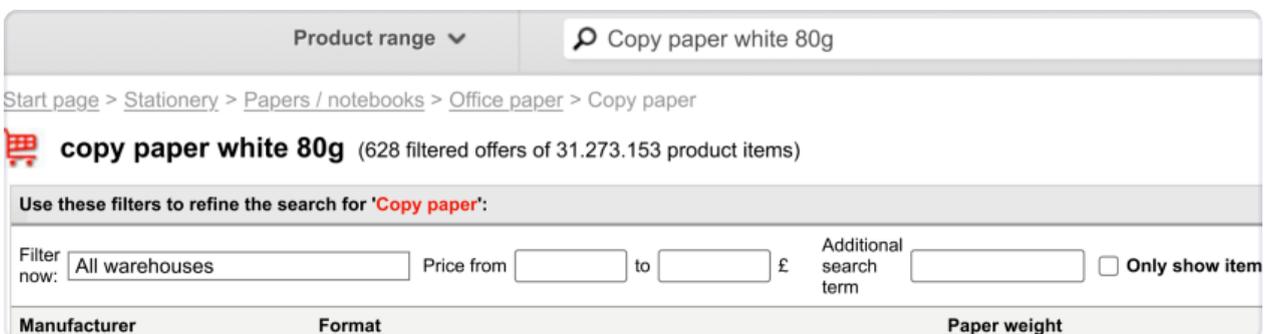

How to filter search results

On the search results page, you'll see a wide range of offers and filters to choose from. Select the relevant filter, such as 'Manufacturer', 'Certification' or 'in stock' to narrow down your search. You can also filter by product characteristics to compare items independently from manufacturers.

Context search

To save even more time when searching, enter the keyword, phrase or item specifications e.g. 'copy paper white 80g' directly into the search field. Your search results will be filtered automatically.

Accessories search

To find suitable accessories quickly, some product groups have a special accessories search function. If you are looking for a toner, for example, enter the manufacturer, series and model of your printer and you will be shown suitable accessories.

How to view search results in list and gallery view

View your search results in gallery view or in list view by selecting the relevant option – either by clicking on 'Gallery' or 'List'.

How to sort search results

When searching on Unite, items from your preferred suppliers are listed at the top. If you don't have additional supplier catalogues, the results are sorted automatically so that the best matching items based on your search appear first. To sort your search results, click on the 'Sort by' drop-down menu, where you can sort your results by relevance, or lowest or highest price.

How to view product details

All items have a product detail page that usually includes information such as product number, brand, manufacturer number, EAN, images, product features, and product data sheets, as well as conditions, e.g. delivery time and available stock.

Click on the item you're interested in and scroll to the product description.

[Read more about product details](#)

How to compare products

Select the 'Product comparison' function and mark all items that you're interested in.

The selected items will now be compared.

Long description:	Ideal for producing professional-quality colour prints at high speeds your HP printer or MFP was built for, while helping protect against fraud. Print vibrant colour documents with Original HP Toner cartridges with JetIntelligence designed for your printer. Choose high-yield options for high-volume office printing[1] and protection against counterfeits with HP anti-fraud technology.	For optimum performance we recommend genuine toner by KYOCERA Document Solutions, which is specially designed for your printer. Toner particles of the incorrect size can lead to poor print quality with streaky grey background or ghosting on the page. KYOCERA Document Solutions toner contains ceramic cleaning beads which are essential to ensure the printer drum is clean and particle free. This is particularly important as our drums are designed to last several hundred thousand copies. A KYOCERA original toner will either have the KYOCERA Document Solutions logo moulded into the toner cassette or the toner will have a green KYOCERA Document Solutions label on it with white writing including our logo.
