Value added. Value shared.

Mandatory catalogue data

This section outlines mandatory fields required for your Unite catalogue. These are crucial for both regulatory compliance and customer satisfaction.

Mandatory fields such as article weights and customs tariff numbers are necessary for compliance with regulations, including the EU Deforestation Regulation (EUDR). They also enhance transparency for customers and enable precise categorisation and classification of your products.

Providing accurate and complete information improves the quality of your product details and increases your visibility to potential buyers.

Detailed information is available for the following topics:

Mandatory catalogue data
Item weight

Mandatory catalogue data
Customs tariff numbers
